ARTIKLER – ARTICLES – ARTICOLI 83

Manuskript afsluttet den 24. september 1979

Manuscript completed 24 September 1979

Manoscritto terminato il 24 settembre 1979

Arbedjssløshed: stabilitet i EUR 9

Antallet af arbejdsløse lå ved udgangen af august for hele Fællesskabet på lidt under 6 mio., hvilket nogenlunde svarer til situationen året i forvejen, og i sæsonkorrigerede tal er der kun sket en meget lille ændring i forhold til juli (-0,1%). Udviklingen har været forskellig i de forskellige lande. I forhold til juli måned er antallet af registrerede arbejdsløse i sæsonkorrigerede tal faldet i Danmark, Luxembourg, Forbundsrepublikken Tyskland, Det forenede Kongerige, Irland og Nederlandene. Derimod har der kunnet konstateres stigninger i Frankrig, Italien og Belgien.

Stadig i forhold til udgangen af juli måned er den andel, som unge under 25 år udgør af det samlede antal arbejdsløse, steget en lille smule i alle de lande; hvor dette tal foreligger, undtagen i Danmark. Man vil desuden bemærke, at EUROSTAT på basis af analyser af situationen de foregående år og af nationale skøn, anslår, at antallet af unge, der har forladt skolen og er gået ud på arbejdsmarkedet ved udgangen af skoleåret 1978/79, må ligge omkring 4,2 mio. personer i hele Fællesskabet. I Forbundsrepublikken Tyskland, Frankrig, Italien og Det forenede Kongerige ligger dette tal på mellem 750 000 og 1 000 000 unge, og det anslås, at i Fællesskabet som helhed har ca. 1/5 af disse unge modtaget undervisning på tredje undervisningstrin.

Industriproduktionen: tilfredsstillende udvikling

Industriproduktionen rettede sig i løbet af andet kvartal 1979. Den var ca. 4,5% højere end i samme kvartal 1978. Opsvinget var særlig markant i produktionen af investeringsgoder, som dog stadig ligger på et relativt lavt niveau.

I juni måned steg industriproduktionen med 1,5%, hvilket især skyldtes stigninger i Forbundsrepublikken Tyskland, Belgien og, i mindre grad, Det forenede Kongerige.

Den kortsigtede stigning i produktionen udviser gunstige tendenser i Forbundsrepublikken Tyskland og Belgien. I Frankrig kan man derimod konstatere en produktionsnedgang på grund af den svage aktivitet i produktionen af investeringsgoder. I de andre lande er det mere usikkert, hvordan den kortsigtede stigning vil udvikle sig.

Stål: fremgangen fortsætter

I august 1979 lå Fællesskabets produktion af råstål (10,7 mio. t) under hensyntagen til sæsonbetingede påvirkninger på samme niveau som i juli, men 14,4% over den tilsvarende mængde året før. Den samlede produktion i årets første otte måneder lå ca. 4% over produktionen i den samme periode i 1978.

I juli 1979 lå de nye ordrer på gængse stål kvaliteter for første gang siden efteråret 1978 klart over det tilsvarende niveau året i forvejen.

De foreløbige tal for udenrigshandelen i andet kvartal 1979 viser en stigning på ca. 4% for eksportens og ca. 7% for importens vedkommende i forhold til samme kvartal i 1978.

Samhandelen inden for Fællesskabet: stabil tendens

I de første 6 måneder af 1979 steg samhandelen mellem EF-landene i værdi med ca. 19% i forhold til samme periode i 1978 og nåede dermed op på 107 mrd. ERE. De største stigninger registreredes i Italien (+31% for importens og +28% for eksportens vedkommende) og i Det forenede Kongerige (henholdsvis +29% og +22%). I øvrigt er Det forenede Kongeriges import fra EF-lande den mindste af alle medlemslandenes, nemlig 44% mod et fællesskabsgennemsnit på 52%. Irland og Belgien tegner sig derimod for den største import fra de andre medlemslande (ca. 70%). Hvad eksporten angår går en betydelig del af Forbundsrepublikken Tysklands eksport til markeder uden for EF (52%), mens Irland i høj grad er afhængig af de andre medlemslande (77%). Det samme gælder, omend i mindre grad, for Nederlandene og Belgien (72%).

I referenceperioden var handelsbalancen i samhandelen inden for Fællesskabet særlig positiv for Nederlandene (+3,2 mrd. ERE) og Forbundsrepublikken Tyskland (+1,8 mrd. ERE). Derimod udviste samhandelen et meget stort underskud for Det forenede Kongeriges vedkommende (-2,2 mrd. ERE) og et relativt stort underskud for Irlands vedkommende (-0,8 mrd. ERE).

Fællesskabets samhandel med tredjelande: meget alvorligt underskud på handelsbalancen

Som følge af den kraftige stigning i priserne på olie og andre råvarer opstod der for juni måned et rekordunderskud på Fællesskabets handelsbalance, 9,2 mrd. ERE siden årets begyndelse, hvilket kan sammenlignes med underskuddet under den første energikrise i 1974 (januar-juni 1974 = -9,8 mrd. ERE). I samme periode i 1978 var dette underskud kun 1/3 så stort (-3,1 mrd. ERE). Skønt dets overskud er faldende, er Forbundsrepublikken Tyskland stadig væk det eneste medlemsland med en positiv handelsbalance (4,1 mrd. ERE). Alle de andre medlemslande registrerede større eller mindre underskud (Frankrig: -2,1, Italien: -1,5, Nederlandene: -3,9, Belgien: -1,0, Det forenede Kongerige: -3,8, Irland: -0,4 og Danmark: -0,6 mrd. ERE). Denne uheldige tendens skyldes dels en meget kraftig stigning i værdien af medlemsstaternes import fra tredjelande (Italien: +25%, Irland: +20%, Forbundsrepublikken Tyskland: +17%), dels en nedgang i eksporten, især i Det forenede Kongerige (-5%). I forhold til januar-juni 1978 har stigningen i importen for hele Fællesskabet været dobbelt så stor som stigningen i eksporten (+14% mod 7%). I absolutte tal lå EF's import i årets første 6 måneder på ca. 100 mrd. og eksporten på ca. 91 mrd. ERE.

Forbrugerpriser i august 1979

Forbrugerprisindekset for EF-landene som helhed steg med 0,7% fra juli til august 1979.

Den største stigning registreredes i Danmark (1,7%), hvor 0,6% skyldes forhøjede afgifter på tobak og gas.

Ligeledes registreredes en stor stigning i Irland, hvor den månedlige stigning i gennemsnit var ca. 1,4% i tredje kvartal 1979. Også fra Italien (1,0%), Det forenede Kongerige (0,8%) og Frankrig (0,8%) rapporteredes om betydelige stigninger.

Stigningerne i Benelux-landene var igen moderate: Nederlandene og Belgien (0,5%), Luxembourg (0,3%); den laveste stigning registreredes i Forbundsrepublikken Tyskland (0,1%).

Priserne er steget med 10,7% for EUR 9 og 11,6% for USA siden august 1978.

Penge og finanser: højere rentefod

Den vigtigste begivenhed på de internationale valutamarkeder siden begyndelsen af juli måned har været yen'ens fald på 4,5% over for ECU. Også dollar'en faldt, nemlig med lidt over 1%. Mellem EF-valutærne indbyrdes registreredes de vigtigste svingninger mellem den franske franc på den ene side og pund sterling og lire på den anden side (henholdsvis +3% og +1,5% i forhold til den franske franc).

Der har i de seneste måneder været en generel stigning i rentefoden. I Belgien og Det forenede Kongerige er diskontoen blevet hævet med 2% siden begyndelsen af maj, og i Forbundsrepublikken Tyskland, Nederlandene og Danmark med 1% siden slutningen af juni. Rentefoden for kortfristede lån er ligeledes blevet hævet i Frankrig og Italien.

Unemployment: stability in the Community as a whole

At the end of August the number of unemployed in the Community as a whole stood at slightly under 6 million; this is more or less the same as last year and represents only a very slight change compared with July (-0.1% in seasonally adjusted figures). The general trend differed from country to country. Compared with July the number of registered unemployed (seasonally adjusted) fell in Denmark, Luxembourg, the FR of Germany, the United Kingdom, Ireland and the Netherlands, but went up in France, Italy and Belgium.

Again in comparison with the end of July, the number of young persons under 25 as a proportion of the total number of unemployed increased slightly in all the countries where this information is available, with the exception of Denmark. It should also be noted that, on the basis of analyses of the situation in previous years and some national estimates, the SOEC estimates that the number of young persons leaving the school system and looking for employment at the end of the 1978/79 school year must have been around 4.2 million in the Community as a whole. In the FR of Germany, France, Italy and the United Kingdom, this number was probably between 750 000 and 1 000 000, and it may be estimated that in the Community as a whole approximately one-fifth of these had been in higher education.

Industrial production: satisfactory growth

Industrial output picked up again during the second quarter of 1979, showing an increase of 4.5% over the same quarter of 1978. The recovery was particularly marked in the capital goods industries, although their output is still relatively low.

In June industrial output went up by 1.5% , mainly as a result of increases in Germany, Belgium and, to a lesser extent, the United Kingdom. The short-term growth in output shows favourable trends in Germany and Belgium. In France, on the other hand, output slowed down as a result of the low level of activity in the capital goods industries. In the other countries the trends in short-term growth are more uncertain.

Steel production: improvement confirmed

In August 1979 Community production of crude steel (10.7 million t) stood at the same level — taking account of seasonal factors — as in July, but was 14.4% up on the corresponding figure for the previous year. Total production in the first eight months of the year is some 4% higher than in the same period of 1978.

In July 1979 new orders for tonnage steels were distinctly higher than the previous year's level for the first time since autumn 1978.

The provisional external trade figures for the second quarter of 1979 indicate an increase of some 4% for exports and 7% for imports compared with the same quarter of 1978.

Intra-Community trade: trend sustained

During the first six months of 1979 the value of intra-Community trade increased by approximately 19% compared with the same period of 1978, to stand at 107 thousand million EUA. The most appreciable increases were recorded by Italy ($+31\%$ for imports and $+28\%$ for exports) and the United Kingdom ($+29\%$ and $+22\%$ respectively). The latter country's share of intra-Community purchases is, however, the lowest of all the Member States, 44% as against a Community average of 52% . On the other hand, Ireland and Belgium are the countries with the biggest share of imports from the other Member States (approximately 70%). As for exports, Germany directs its sales more towards markets outside the Community (52%), whereas Ireland depends heavily on the other Member States (77%), as do the Netherlands and Belgium, although to a lesser extent (72%).

During the period under review, the intra-Community trade balance was especially positive for the Netherlands ($+3.2$ thousand million EUA) and Germany ($+1.8$ thousand million EUA). On the other hand, the trade balance was very much in the red for the United Kingdom (-2.2 thousand million EUA) and, relatively, Ireland (-0.8 thousand million EUA).

Community external trade: serious deficit in the trade balance

Following the sharp increase in the price of oil and other raw materials, the deficit in the Community's trade balance reached new peaks in June: -9.2 thousand million EUA since the beginning of the year, comparable with the figures recorded at the time of the first energy crisis in 1974 (January-June 1974: $+9.8$ thousand million EUA). During the same period of 1978 the deficit had been three times smaller (-3.1 thousand million EUA). Although its surplus is falling, Germany is still, as in the past, the only Member State whose trade balance is positive (4.1 thousand million EUA). All the other Member States recorded increasingly greater deficits (France: -2.1 , Italy: -1.5 , the Netherlands: -3.9 , Belgium: -1.0 , the United Kingdom: -3.8 , Ireland: -0.4 , and Denmark: -0.6 thousand million EUA). This unfavourable trend is due, naturally, to a very substantial increase in the value of the Member States' purchases from non-member countries (Italy: $+25\%$, Ireland: $+20\%$, Germany: $+17\%$ and to a slowing down in sales which was particularly appreciable in the case of the United Kingdom (-5%). For the Community as a whole the increase in imports was twice as high as that in exports ($+14\%$ as against $+7\%$) compared with the period from January to June 1978. In terms of absolute value, the Community's purchases amounted to approximately 100 thousand million EUA and sales to approximately 91 thousand million EUA during the first six months of this year.

Consumer Prices in August 1979

The consumer price index for the EC as a whole rose by 0.7% from July to August 1979.

The biggest increase was registered in Ireland, where average monthly increase was around 1.4% during the third quarter of 1979. Significant rises were reported also from Italy (1.0%), the United Kingdom (0.8%) and France (0.8%).

Increases in the Benelux countries were moderate again: Netherlands and Belgium 0.5% , Luxembourg 0.3% , whereas the lowest rise was recorded in RF Germany (0.1%).

Prices have risen by 10.7% for EUR 9 and by 11.6% for the USA since August 1978.

Finance: increase in interest rates

The main feature of the international exchange markets since the beginning of July was the 4.5% fall in the value of the yen in terms of the Ecu. The dollar also fell by slightly more than 1% . Among Community currencies, the greatest fluctuations were recorded between the French franc on the one hand and sterling and the Italian lira on the other ($+3\%$ and $+1.5\%$ against the franc respectively).

A general increase in interest rates was recorded in the past few months. In Belgium and the United Kingdom the official discount rate (bank rate) was raised by 2% since the beginning of May, and in Germany, the Netherlands and Denmark by 1% since the end of June. Short-term interest rates were likewise raised in France and Italy.

Disoccupazione : stazionaria per EUR 9

A fine agosto si contavano in tutta la Comunità poco meno di sei milioni di disoccupati : questa cifra corrisponde all'incirca alla situazione dell'anno scorso e rappresenta solo una lievissima variazione rispetto al mese di luglio (— 0,1 % in dati corretti delle variazioni stagionali). L'evoluzione è stata però diversa a seconda dei paesi : rispetto al mese di luglio e sulla base dei dati destagionalizzati, il numero dei disoccupati iscritti risulta diminuito in Danimarca, nel Lussemburgo, nella R.F. di Germania, nel Regno Unito, in Irlanda e nei Paesi Bassi, e aumentato invece in Francia, in Italia e in Belgio.

Sempre rispetto alla situazione di fine luglio, la percentuale dei giovani di meno di 25 anni nel totale dei disoccupati risulta lievemente aumentata in tutti i paesi che sono in grado di fornire quest'informazione, tranne che in Danimarca. Va rilevato inoltre che, sulla scorta di analisi della situazione degli anni precedenti e di talune stime nazionali, l'Istituto statistico ha valutato sui 4,2 milioni di persone, per l'intera Comunità, il numero dei giovani che alla fine dell'anno scolastico 1978 / 79 hanno lasciato la scuola presentandosi sul mercato del lavoro : per la R.F. di Germania, la Francia, l'Italia e il Regno Unito si tratta di una cifra compresa ogni volta tra 750 000 e 1 000 000 di giovani, di cui un quinto circa (per la Comunità nel suo complesso) muniti di un titolo di studio di livello universitario o equipollente.

Produzione industriale : andamento soddisfacente

Nel corso del secondo trimestre del 1979 la produzione industriale ha segnato una ripresa, collocandosi ad un livello che supera del 4,5 % quello del trimestre corrispondente del 1978. Il miglioramento è particolarmente netto nelle industrie dei beni d'investimento, che restano cionondimeno ad un livello di attività relativamente basso.

Nel mese di giugno la produzione industriale ha segnato un'espansione dell'1,5 %, dovuta soprattutto agli incrementi registrati in Germania e in Belgio e, in minore misura, nel Regno Unito.

Lo sviluppo della produzione nel breve periodo presenta un andamento favorevole in Germania e in Belgio, mentre in Francia si osserva un rallentamento produttivo, dovuto alla debole attività nelle industrie dei beni d'investimento. Negli altri paesi l'andamento di breve periodo appare invece tendenzialmente molto più incerto.

Produzione d'acciaio : conferma del miglioramento

Nell'agosto 1979 la produzione comunitaria di acciaio grezzo (10,7 milioni di tonnellate) si è collocata ad un livello che, tenuto conto delle influenze stagionali, è pari a quello del mese di luglio, ma supera del 14,4 % il volume corrispondente dell'anno precedente. La produzione cumulata dei primi otto mesi supera del 4 % circa quella del corrispondente periodo del 1978.

Inoltre, per la prima volta dall'autunno del 1978, nel mese di luglio 1979 i nuovi ordinativi di acciai correnti hanno superato nettamente il livello corrispondente dell'anno prima.

Le cifre provvisorie del commercio estero nel secondo trimestre del 1979 indicano, rispetto allo stesso trimestre del 1978, un aumento del 4 % circa per le esportazioni e del 7 % per le importazioni.

Commercio intracomunitario : tendenza sostenuta

Nei primi sei mesi del 1979 gli scambi tra i paesi della Comunità sono aumentati, in valore, del 19 % circa rispetto allo stesso periodo del 1978, assommando così a 107 miliardi di UCE. Gli aumenti più sensibili sono stati registrati dall'Italia (+ 31 % all'importazione e + 28 % all'esportazione) e dal Regno Unito (rispettivamente + 29 % e + 22 %), paese caratterizzato peraltro da una quota di acquisti intracomunitari inferiore a quella di tutti gli altri Stati membri (44 % contro una media comunitaria del 52 %). L'Irlanda e il Belgio sono invece i paesi le cui importazioni provengono in maggior misura dagli altri paesi membri (70 %). Per le esportazioni, la Germania orienta le proprie vendite prevalentemente verso i mercati al di fuori della Comunità (52 %); l'Irlanda dipende invece fortemente dagli altri paesi membri (77 %); analoga situazione presentano i Paesi Bassi ed il Belgio, sebbene in misura minore (72 %).

Nel periodo considerato, la bilancia degli scambi commerciali intracomunitari è stata particolarmente positiva per i Paesi Bassi (+ 3,2 miliardi di UCE) e la Germania (+ 1,8 miliardi di UCE). Il saldo di tali scambi presenta invece un disavanzo molto forte per il Regno Unito (— 2,2 miliardi di UCE) e uno relativamente importante per l'Irlanda (— 0,8 miliardi di UCE).

Commercio estero della comunità : fortissimo disavanzo della bilancia commerciale

In seguito all'impennata dei prezzi del petrolio e delle altre materie prime, il disavanzo della bilancia commerciale della Comunità ha raggiunto nel mese di giugno un nuovo record (— 9,2 miliardi di UCE dall'inizio dell'anno), di entità paragonabile al deficit registrato nel 1974 all'epoca della prima crisi dell'energia (gennaio-giugno 1974 : — 9,8 miliardi di UCE). Nel primo semestre del 1978 il disavanzo era stato di entità pari a un terzo di quello attuale (— 3,1 miliardi di UCE). Come in passato, la Germania resta il solo paese membro con una bilancia commerciale positiva, sebbene anche l'attivo tedesco (4,1 miliardi di UCE) sia in diminuzione. Tutti gli altri paesi membri hanno registrato disavanzi sempre maggiori (Francia : — 2,1; Italia : — 1,5; Paesi Bassi : — 3,9; Belgio : — 1,0; Regno Unito : — 3,8; Irlanda : — 0,4; Danimarca : — 0,6 miliardi di UCE). Questa tendenza negativa è dovuta a due componenti : da un lato, naturalmente, un fortissimo aumento del valore degli acquisti dei paesi membri al di fuori della Comunità (Italia : + 25 %; Irlanda : + 20 %; Germania : + 17 %) e, d'altro lato, un rallentamento delle vendite all'estero, sensibile soprattutto per il Regno Unito (— 5 %). Rispetto al periodo gennaio-giugno 1978, l'espansione delle importazioni per il complesso della Comunità è stata doppia rispetto a quella delle esportazioni (+ 14 % contro 7 %). In valore assoluto, gli acquisti della UCE hanno raggiunto nei sei primi mesi di quest'anno la cifra di circa 100 miliardi di UCE, contro un valore di 91 miliardi di UCE per le vendite.

I prezzi al consumo in Agosto 1979

I prezzi al consumo per l'insieme della Comunità Europea sono aumentati di 0,7 % fra Luglio e Agosto 1979. L'aumento più forte è stato registrato in Danimarca (1,7 %), di cui 0,6 %, dovuto agli aumenti di tasse sul tabacco e il gas.

Un altro aumento sensibile è stato registrato in Irlanda dove i prezzi sono aumentati \pm 1,4 % al mese durante il terzo trimestre del 1979.

Degli aumenti sensibili sono stati registrati ugualmente in Italia (1,0 %), nel Regno Unito (0,8 %) e in Francia (0,8 % stima).

Gli aumenti nei paesi del Benelux sono stati ancora una volta moderati : Paesi Bassi e Belgio 0,5 %, Lussemburgo 0,3 %, mentre l'aumento meno sensibile è stato registrato in Germania (R.F.) (0,1 %).

Da Agosto 1978 i prezzi sono aumentati di 10,7 % per EUR 9 e di 11,6 % per gli USA.

Finanze : aumento dei tassi d'interesse

Il fenomeno più rilevante osservato sui mercati dei cambi internazionali dall'inizio del mese di luglio è la caduta, pari al 4,5 %, del valore dello Yen espresso in ECU; il dollaro registra a sua volta una flessione di oltre l'1 %. Tra le valute comunitarie, le maggiori fluttuazioni si osservano considerando da un lato il franco francese e dall'altro la lira sterlina e la lira italiana (rispettivamente + 3 % e + 1,5 % rispetto al franco).

Negli ultimi mesi si è osservato d'altro canto un aumento generale dei tassi d'interesse. Il tasso ufficiale di sconto è stato alzato di 2 punti percentuali, dall'inizio di maggio, un Belgio e nel Regno Unito e di 1 punto, dalla fine di giugno, in Germania e nei Paesi Bassi. I tassi d'interesse a breve termine sono aumentati inoltre anche in Francia e in Italia.

Denne publikation omfatter to dele: den ene indeholder »fællesskabstabeller« og den anden »tabeller efter lande«.

I »fællesskabstabellerne« er samlet de vigtigste indikatorer for Fællesskabets og for hver medlemsstats økonomiske udvikling på kort sigt, uddybet med nogle strukturelle oplysninger for året 1975. Denne del, som skal muliggøre sammenligninger mellem landene, indeholder der for kun af EUROSTAT harmoniserede tal, på grundlag af fælles kriterier, hvilket forklarer visse uoverensstemmelser med de nationale tal.

Rækkerne er korrigerede for sæsonvariationer ved hjælp af EUROSTAT's »Dainties«-metode. **De mest aktuelle tal er foreløbige og i visse tilfælde direkte skønnede af EUROSTAT.**

Som indikator for verdenskonjunkturudviklingen indeholder »fællesskabstabellerne« en søjle for USA.

I »tabellerne efter lande« er for hvert land udvalgt de for det pågældende land mest anvendte konjunktuelle indikatorer; det drejer sig om nationale rækker, i overensstemmelse med nationale kriterier og sæsonkorrigerede efter nationale metoder. I denne del er der ud

over Fællesskabets ni medlemslande medtaget kandidatlandene Spanien, Grækenland og Portugal, såvel som USA og Japan.

For alle rækkerne findes de historiske tal (årlege, kvartals- og månedstal) i EUROSTAT's databank CRONOS. Almindeligvis går tallene tilbage til 1960, og kan oplyses på anmodning.

Denne publikation indeholder kun et yderst minimalt antal metodologiske bemærkninger. Oplysninger om definitioner, metoder, fællesskabstilpasninger og kilder for hver enkelt række vil blive givet i en specialudgave af »EUROSTATISTIK«, hvori de statistiske angivelers definitioner, metoder, tilpasninger og kilder vil blive beskrevet.

Der udkommer to udgaver af »EUROSTATISTIK« hver måned. Den ene affattet på dansk, engelsk og italiensk leveres til trykning den fjerde tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Den anden affattet på tysk, fransk og nederlandsk leveres til trykning den anden tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Hver udgave indeholder de mest aktuelle tal til disposition den dag leveringen til trykning finder sted.

PREFACE

EN

This bulletin is in two parts : 'Community Tables' and 'Country Tables'.

The Community Tables contain the main indicators useful for following short-term economic developments in the Community as a whole and in the Member States, supplemented by a certain amount of structural data relating to 1975. This part of the bulletin is intended to make possible real comparisons between countries and therefore only contains data which has been harmonized by EUROSTAT on the basis of common criteria, this explains many of the differences from national series.

Seasonal adjustment of the series has been done with EUROSTAT's own method, 'Dainties'. **The most recent data are provisional and in some cases estimated by EUROSTAT.**

Finally the Community Tables include a column for the USA as an indicator of changes in the world economy.

The Country Tables contain a selection of the economic indicators most often used in each country. They are national series based on

the definitions of the country concerned and seasonally adjusted by the country. In addition to the nine Community countries this section includes the three candidate countries (Spain, Greece and Portugal) the USA and Japan.

For all series, historical data (annual, quarterly or monthly) is available in EUROSTAT's CRONOS data bank, going back in most cases to 1960. This can be supplied on request.

This publication contains the absolute minimum of methodological notes. Details of definitions, methods, Community adjustments and sources of each series will be given in a special edition of 'Eurostatistics'.

Two versions of 'EUROSTATISTICS' come out every month. The first in Danish, English and Italian goes to the printers the fourth Tuesday of the month and will be distributed in the national capitals the following Monday. The second in German, French and Dutch goes to the printers the second Tuesday of the month and will be distributed in the national capitals the following Monday. Each version will contain the latest figures available when it went to press.

AVVERTENZA

IT

Il presente bollettino consta di 2 parti : l'una ha per oggetto alcune « tavole comunitarie », l'altra riguarda alcune « tavole per paese ».

Nelle tavole « comunitarie » si trovano riuniti i principali indicatori che consentono di seguire l'evoluzione di breve periodo dell'economia comunitaria nel suo complesso e in ogni singolo Stato membro, completati da alcuni dati strutturali relativi al 1975. Questa parte, che si prefigge di consentire di stabilire confronti reali fra paesi, contiene soltanto dati armonizzati dall'EUROSTAT in base a criteri comuni, il che spiega l'esistenza di certe differenze rispetto ai dati nazionali.

Le variazioni stagionali delle serie sono eliminate con il metodo « Dainties » dell'EUROSTAT. **I dati più recenti sono provvisori e, a volte direttamente stimati da EUROSTAT.**

Nelle tavole comunitarie figura una colonna relativa agli Stati Uniti d'America a titolo di indicatore dell'evoluzione della congiuntura mondiale.

Nelle « tavole per paesi » si riporta una selezione degli indicatori congiunturali più correntemente adoperati in ogni paese; si tratta di serie nazionali, corrispondenti ai criteri nazionali e « destagionaliz-

zate » per mezzo dei metodi nazionali. In questa parte sono presi in considerazione oltre ai 9 paesi membri della Comunità, i paesi candidati all'adesione: Grecia, Portogallo, Spagna, nonché gli Stati Uniti d'America e il Giappone.

Per tutte le serie, presso il sistema CRONOS dell'EUROSTAT sono disponibili dati storici (annui, trimestrali o mensili) risalenti in generale al 1960, i quali possono essere forniti su richiesta.

La presente pubblicazione contiene soltanto annotazioni metodologiche ridotte allo stretto minimo. Le informazioni relative alle definizioni, ai metodi, agli aggiornamenti comunitari e alle fonti di ogni serie saranno riportate in un fascicolo speciale (ad hoc) di EUROSTATISTICHE avente per oggetto le definizioni, i metodi, gli aggiornamenti e le fonti dei dati statistici.

Ogni mese vengono pubblicate due versioni di « EUROSTATISTICHE ». La prima redatta in danese, inglese e italiano, che va in stampa il 4° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo; la seconda redatta in tedesco, francese e olandese, che va in stampa il 2° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo. Ogni versione riporta le ultime cifre disponibili il giorno della stampa.

DI RECENTE PUBBLICAZIONE

91

- (1) Alcuni dati più dettagliati per branca sono riportati nel bollettino « Indicatori congiunturali dell'industria ».
- (2) I dati contenuti in questa parte del bollettino rappresentano i risultati dell'indagine sulla congiuntura presso i capi di impresa delle Comunità. Alcuni dati più particolari figurano in « Economia europea ».
- (3) Alcuni dati del commercio estero più dettagliati ed espressi in UCE sono riportati nel « Bollettino mensile del commercio estero ».
- (4) Eonsumi finali delle famiglie.

DE

Die deutsche Fassung dieses Bulletins wird am zweiten Dienstag jeden Monats in Druck gegeben.

FR

La version française de ce bulletin est mise sous presse le second mardi de chaque mois.

NL

De Nederlandse versie van dit bulletin gaat de tweede dinsdag van elke maand ter perse.

ENERGY SUPPLY AND DEMAND IN THE FIRST MONTHS OF 1979

In the first half-year of 1979, the salient features of the Community's energy supply situation were as follows:

- stability of primary production, imports and deliveries of coal, the only major change being a marked increase in the coal burnt in power stations;

- an increase in the supply of crude oil despite its escalating dollar price. The supply situation, however, has been adversely affected by the Iranian crisis even though there was a 20% increase in deliveries from other petroleum-exporting third-party countries and a 60% increase in United Kingdom production of crude to a level, in the first half year which represented 15% of Community imports from third countries as opposed to 10% in 1978;

- an increase in deliveries of gas/diesel oils due to the very hard winter. In January it was particularly noticeable that average monthly temperatures were 2 to 6 °C lower than the corresponding month of 1978.

- an increase in deliveries of residual fuel oil, which was partly substituted for natural gas in conventional thermal power stations;

- growth in the Community's gross inland consumption of natural gas which was covered firstly by a similar growth in the Community's production of natural gas and secondly by a large increase in the imports of natural gas from third-party countries (notably Norway);

- the increase in the Community's inland consumption of electrical energy in the first half of 1979 was close to the historical growth rate of a doubling of consumption every 10 years. This increase in consumption was met by growth in the conventional thermal and nuclear production of electricity. Hydroelectric conditions in the first half year of 1979 were less favourable than in 1978.

1. CONSUMPTION AND DELIVERIES OF ENERGY-GENERATING PRODUCTS

a) Coal deliveries

In the first quarter of 1979, coal deliveries in the Community as a whole did not greatly differ from those in the first quarter of 1978. Deliveries to conventional thermal power stations, to the industrial sector and to households declined by 1.3, 0.7 and 0.2% respectively, while deliveries to coking plants increased by 3.2%.

The drop in deliveries to power stations at Community level is essentially due to a fall of 6.8% in deliveries to power stations in the United Kingdom as a result of transport difficulties. This fall in

deliveries was offset in terms of supply to United Kingdom power stations by a 5.4 million tonne reduction in stocks in January 1979.

b) Deliveries of petroleum products

In the Community as a whole, deliveries of distillate fuels in the first five months of 1979 were 2.4% higher than in the same months of 1978. This may be accounted for in terms of the differing weather conditions in the two years as distillate fuels are used principally for transport and households. However, deliveries developed very differently from country to country. In Italy, Belgium, Luxembourg and Denmark there were increases in excess of 14% with a maximum of 19% for Denmark. In the United Kingdom and Ireland, the increase was less marked, ranging from 4 to 10%. In Germany, France and the Netherlands, on the other hand, deliveries decreased by 0.4, 4.1 and 7.7% respectively. These differences may be explained in terms of the greater or lesser expansion of the use of natural gas to cover household requirements.

Deliveries of residual fuel oil, which are essentially determined by power station and industrial requirements, increased by about 9% for the Community as a whole. This rise was apparent in all countries and especially the Netherlands, where it exceeded 120%. The causes of these increases will be discussed below.

c) Overall consumption of natural gas

In the Community as a whole, overall consumption of natural gas was about 13% higher in January to March 1979 than in January to March 1978. This development was predictable in that natural gas is increasingly being used for space heating. It is significant, however, that this increase of 13% for the Community is made up of increases which vary greatly from country to country and, moreover, these variations in demand for natural gas are closely linked with those variations in deliveries of distillate fuels. In Germany, deliveries of distillate fuels declined by 0.4% while consumption of natural gas increased by 16.8%; in France the corresponding figures are -4.1% and +13.3% respectively; in Italy, +16.0% and -2.1% (i.e. a reduction in consumption of natural gas); in the Netherlands, -7.7% and +12.4%; in Luxembourg, +16.8% and +2.7%; in the United Kingdom, +3.9% and +19.4%. A large (small) change in deliveries of distillate fuels thus corresponds to a small (large) change in consumption of natural gas, the only exception being Belgium. In each country, the rise in demand between 1978 and 1979 thus seems to have been almost entirely restricted either to natural gas or to distillate fuels (this phenomenon could be analysed in greater detail if the consumption and delivery data were available separately for the sectors 'industry', 'transport' and 'households').

d) Transformation in publicly-owned conventional thermal power stations and overall electricity consumption

In the first four months of 1979 there was an appreciable change, as compared with the same months in 1978, in the fuels burnt in publicly-owned conventional thermal power stations. In most countries, the coal burnt increased by about 15% (the only exception being the Netherlands), consumption of natural gas was reduced, sometimes substantially (in the United Kingdom, for example, there was a drop of almost 80% though in Germany and Belgium the consumption of natural gas was slightly increased) and there was a general and quite marked increase of about 20% in consumption of petroleum products (in the Netherlands consumption increased by 250%, admittedly from a fairly low level in 1978). It would thus appear that in the various countries an attempt was made to effect savings in natural gas consumption and to reserve it for premium applications where neither coal nor fuel oil could be substituted. This particularly applies to the Netherlands which embarked on a programme to convert a large proportion of gas-fired power stations to fuel oil.

In the Community as a whole, overall electricity consumption was 7.7% higher in the first four months of 1979 than in 1978. This approximates, after the hiatus of the last six years, to the traditional growth rate whereby electricity consumption doubled every ten years. The increase was apparent in all the countries, the smallest being observed in the United Kingdom (+6.4%) and the largest in Ireland (+12.9%).

This consumption was covered by a level of net production which was 10.4% higher in conventional thermal power stations, 5.8% lower in hydroelectric stations and 9.8% higher in nuclear power stations. The increase in nuclear power is largely accounted for by the 35.4% rise in French nuclear production due to three new reactors which came on stream in May 1978 (Bugey 2, 3 and 4).

2. SUPPLY OF ENERGY-GENERATING PRODUCTS

a) Primary production

In the first half of 1979 coal production was only slightly higher than in the first half of 1978, increasing from 121.5 to 122.6 million tonnes. Moreover, this increase was due entirely to a 5% rise in

German production as production dropped in the other countries. On the other hand, there was an increase of about 12% in production of brown coal, largely for use in power stations.

In the first four months of 1979 production of crude oil in the Community as a whole increased by about 50%. In the United Kingdom, production rose by about 60% to 23.6 million tonnes. If this rate of increase were maintained in the short term, it would result in an annual production level for 1979 of 83 million tonnes, covering about 90% of the requirements of the United Kingdom refineries.

The main producers of natural gas, the United Kingdom and the Netherlands, increased production by 10 and 8% respectively in the first three months of 1979. In the United Kingdom, however, this rise was not entirely sufficient to cover demand, which was also increasing, with the result that greater quantities had to be imported.

b) Imports

Total coal imports remained at much the same level (-0.2%), but there was some change in the sources of supply. The proportion imported from third countries increased from 70 to 73%, reflecting a 12% drop in intra-Community supply over the period January to April.

Imports of crude oil from third countries increased by about 5% over the first five months of 1979 to restore the level of stocks which was low even at the beginning of the winter and which had seriously deteriorated as a result of winter demand (to these movements must be added supplies from the United Kingdom which were still slight but had doubled in quantity). The proportion of crude oil imported from the Near and Middle East fell from 72 to 66%. This drop is due to the decline in imports from Iran, which were 72% lower than in 1978 with the result that Community supplies from this source fell by 21.8 million tonnes (over the period January to May). As the total drop in imports from the Near and Middle East was 4.7 million tonnes, 17.1 million tonnes of the reduction in Iranian supplies were offset by a substantial increase of 15.8% in deliveries from other countries in the Near and Middle East.

Total imports of natural gas increased by about 15% to satisfy demand, which was also expanding. The rate of increase in supplies from the Netherlands, however, was only about a quarter of that for third countries as a result of the Netherlands' policy of conserving its natural gas resources. It should also be noted that although the Netherlands and the United Kingdom are major producers of natural gas, they substantially increased their own imports of gas.

Grøn serie :

Regnskaber-Landbrug, skovbrug, enhedsværdier
ISBN 92-825-0779-3

194 sider. Format A 4.

Flersproget udgave. Udkommet i Juli 1979.

De seneste tal vedrørende landbrugssektorregnskabet og skovbrugssektorregnskabet samt vedrørende enhedsværdierne. Denne udgave indeholder :

- tabeller, udarbejdet for hvert land med kronologiske rækker over medlemsstaternes og Fællesskabets endelige produktion, det intermediære forbrug, værditilvækst og faste investeringer udregnet i national valuta og i ERE, i løbende priser (og vekselkurser) samt i faste priser (og vekselkurser). Tallene for landbrugssektorregnskabet gælder tidsrummet 1967-1977;
- tabeller, udarbejdet for hele Fællesskabet med angivelser, som muliggør en vurdering af den strukturelle ændring i sammensætningen af den endelige produktion, det intermediære forbrug, værditilvæksten og de faste investeringer i landbruget;
- kronologiske rækker med enhedsværdier, udregnet i national valuta og i ERE for udvalgte landbrugsprodukter.

DKR 88	HFL 34,40
DM 31,60	UKL 8,40
FF 72,70	USD 16,70

Most recent data on agriculture and forestry accounts and on unit values. This edition includes:

- tables showing time-series for final production, intermediate consumption, gross value added and fixed capital formation, for each of the Member States and the Community, in national currencies and in EUA at current prices (and exchange rates) and at constant prices (and exchange rates). The data on agricultural accounts relate to the period from 1967 to 1977;
- Community tables containing data showing the structural development of the constituents of final production, of intermediate consumption and of fixed capital formation in agriculture;
- time-series for unit values in national currency and in EUA for selected agricultural products.

Serie verde :

Conti economici — Agricoltura, silvicoltura, valori unitari
ISBN 92-825-0779-3

194 pagine. Formato A 4.
Edizione multilingue luglio 1979.

Dati più recenti relativi ai conti dell'agricoltura e della silvicoltura e ai valori unitari. In questa edizione figurano :
— delle tabelle per paese, che presentano le serie cronologiche relative alla produzione finale, ai consumi intermedi, al valore aggiunto, e agli investimenti fissi, per i paesi membri e per la Comunità, in moneta nazionale e in UCE, calcolati a prezzi (e tassi di cambio) correnti e costanti. I dati dei conti dell'agricoltura si riferiscono al periodo 1967-1977;
— delle tabelle comunitarie che presentano dati per una valutazione dello sviluppo strutturale dei componenti della produzione finale, dei consumi intermedi, del valore aggiunto e degli investimenti fissi in agricoltura;
— delle serie cronologiche dei valori unitari in moneta nazionale e in UCE per alcuni prodotti agricoli selezionati.
